

How to Wear the Beret

The beret is worn evenly on the head. The leather sweatband is to be 2.5 cm (1 in) above the eyebrows. The crown of the beret is to be pulled downwards to the right and to the rear. The cap badge is positioned 2.5 cm (1 in) above the leather sweatband and directly over the left eye. The drawstrings must be tucked inside the sweatband.

A rough check to make sure that the beret is 2.5 cm (1 in) above the eyebrows is to use the width of two fingers.

Hair must not be allowed to hang down over the forehead and should be tucked under the beret.
